

Modern Cupping Therapy Workshop

May 11-13, Friday-Sunday, 9-5 p.m.

Course description:

Modern cupping therapy is a 3-day workshop covering the modern use of cupping for pain-relief and to address conditions such as: fibromyalgia, diabetes, pre- and post-op edema and inflammation, chronic edema, scar tissue and adhesions, and cellulite. The course includes education in the history, theory and application of modern cupping therapy, along with demonstration of specific techniques. It will also cover the safety and contraindications, conditions that benefit from the modern cupping techniques, integration into existing modalities, and applications for specific conditions. Don't miss the opportunity to add this to your "toolbox."
